story of a double tenement in Essex street," a Sick Bables' Fund doctor said, "I found little Behr Rubinson, a newold, but already suffering from infantile allments, which so often cut down the young lives in the Summer. Little Behr's stomach could not digest all the rough things he received as food, and his comer into this world, only eleven weeks

GIVEN TO THE TOTS, mother 'could not better him,' as she expressed it, because she did not have even money to buy plain milk, and little expressed it, because she did not have even money to buy plain milk, and little Behr was fast failing when I happened to come across his case. I supplied the necessary food; attended the terrible diarrhoen the child had, and sent them off on the fresh air excursion. Yester-day I made my revisit and I failed to recognize in the plump, bouncing baby his little emaciated child that I treated some days ago."

"For the last three weeks I have been attending a very pathetic case of a lit-tle girl nine years of age, who is suffering from Bright's disease and serious lung trouble." said another free doctor. "She is very old-fashioned for her years, patient and bears her illness stoically She is confined to the corner of a lounge alongside the front window, where she sits day after day and most of the nights-being unable to breathe in the recumbent position and unable to walk on account of dropsy-watching the street players at their games and amuse-ments and longing to be with them. Her home is one of the poorest, parents unable to provide the necessary articles of comfort for her and often unable to get food for the whole family. Her mother has two children sounger than she, who have recently been quite ill with Summer trouble and required constant attention, which has left the little invalid much to herself and help-ex. The father works along shore occasionally, but finds very little to bring home to the sick and suffering ones there. It is a pitiable case and one which strongly appeals to our sympathies." recumbent position and unable to walk
